Raghav Taori

Litchfield, IL | raghav.taori1504@gmail.com | (765) 772-8095 | linkedin.com/in/raghav-taori | github.com/rtaori123

Skills

- **Analytics & BI:** Power Platform (Power BI, Power Automate), DAX, SQL Server, Excel, KPI Reporting
- **Data Engineering:** Python (Pandas, NumPy), ETL, Dimensional Modeling, APIs, Data Validation
- **Analysis:** Forecasting, Root Cause Analysis, Data Visualization, Correlation Analysis, Statistical Testing
- **Business:** Requirements Gathering, Stakeholder Management, Competitive Analysis, Process Mapping

Professional Experience

Dometic *Litchfield, IL*

Product Data Analyst *May 2026 – Present*

- Built and shipped a Python pipeline that benchmarks 17,800 aftermarket SKUs against 8 competitor sources, loading roughly 25,000 matched prices per run into a SQL Server warehouse and Power BI
- Modeled 8M+ sales lines and 5.6M fitment rows into a star schema, replacing a view that could not answer sales-by-engine-brand without double counting
- Corrected a 5x overstatement in reported brand revenue caused by an undetected join fan-out, then built the share-weighted allocation model now standard for sales-by-brand analysis

Product Data Analyst, Intern *Jun 2025 – Jan 2026*

- Elicited reporting requirements from product managers, classified raw parts data into internal product categories, and delivered 7+ Power BI dashboards to identify gaps and prioritize New Product Introduction
- Mapped the U.S. marine industry across 7 states, evaluating 12 product lines and building a GE/McKinsey matrix comparing product performance and competitive positioning
- Benchmarked 5,000+ competitor SKUs to uncover 220 white-space opportunities, informing data-driven range expansion strategy

Hewlett Packard Enterprise *Bengaluru, India*

Software Engineer (Business Intelligence & Analytics) *Mar 2022 – May 2024*

- Analyzed CPU utilization data using SQL and PostgreSQL, feeding a Prophet forecasting model that generated actionable recommendations and identified a path to 15% energy cost reduction
- Drove cross-functional delivery with data, engineering and QA teams, raising the firmware update success rate of a B2B cloud compute operations platform managing 10,000+ servers
- Authored acceptance criteria and built an integration test suite validating 50+ REST API endpoints across 8 microservices, improving coverage and reducing production defects by 35%

Cartzon (Startup) *Bengaluru, India*

Co-founder & Business Strategy Analyst *May 2021 – Jan 2022*

- Founded and launched a peer-to-peer marketplace for 5,000+ college students, conducting 40+ user interviews to validate product-market fit and defining success metrics across 5+ feature releases
- Formulated a go-to-market strategy using Lean Canvas spanning pricing models and acquisition channels, securing 40 paying customers within the first 3 months

Projects

Equity Strategy Backtester *2026*

Python, Pandas, Streamlit *Independent Project*

- Engineered a Streamlit backtesting engine covering a 500-stock equity universe with conditional swing strategies and configurable custom signals, delivered to an external trading client

Demand Intelligence Platform *2026*

Python, PostgreSQL, Web Data Collection *Independent Data Product*

- Shipped an end-to-end demand-intelligence system that turns public construction-permit registries into a scored lead pipeline of 5,000+ contacts ranked across 4 priority tiers

Education

Purdue University *May 2026*

Masters in Engineering Management | ***GPA: 3.77/4*** *West Lafayette, IN*

R.V. College of Engineering *Aug 2022*

Bachelors in Computer and Information Science Engineering | ***GPA: 8.38/10*** *Bengaluru, India*
